Summary

AI & Data Science undergraduate with hands-on experience building 5+ AI/ML and Data Analytics projects using Python, SQL, XGBoost, Power BI, React.js, FastAPI, and Scikit-learn. Developed predictive models with 91%+ accuracy, interactive BI dashboards, and full-stack AI applications. Passionate about machine learning, business intelligence, and scalable AI solutions.

Experience

- CodSoft, Machine Learning Developer Intern**06/2026 – 07/2026
 - Developed 3 machine learning models achieving 91% prediction accuracy.
 - Processed and analyzed 10,000+ records for model training.
 - Improved model accuracy by 12% through feature engineering and hyperparameter tuning.
- Wetech Solution Pvt. Ltd., Flutter App Development Intern**07/2023 – 08/2023 | Surat
 - Developed 5+ responsive mobile application screens using Flutter and Dart.
 - Integrated 4+ REST APIs for real-time data communication.
 - Fixed 20+ application bugs and improved application performance.
- Chameleon Infotech LLP, Android App Development Intern**09/2022 – 09/2022 | Surat
 - Improved application stability by resolving 25+ bugs through testing and debugging.
 - Performed testing and debugging, reducing application crashes during development by 20%.
 - Conducted functional testing across 15+ application screens, improving overall app reliability.

Education

- B.Tech, Artificial Intelligence & Data Science, Sarvajanic College of Engineering & Technology**2025 – 2027
CGPA: 9.18
- Diploma in Computer Engineering, Tapi Diploma Engineering College**2021 – 2024
CGPA: 9.90

Technical Skills

Programming Languages	AI/ML Technologies	Data Analytics	Frameworks
Python, SQL, JavaScript, Java, C,HTML,CSS	Pandas, NumPy, XGBoost, Scikit-learn, Machine Learning, Deep Learning, TensorFlow, PyTorch	Power BI, Power Query, DAX, Excel, Data Visualization	FastAPI, Flask,
Database & Tools SQL, MySQL, SQLite, SQLAlchemy, Git, GitHub, VS Code, Android Studio			

Certificates

- Innovating with Google Cloud AI
 - Introduction to Career Skills in Data Analytics
 - IBM Coursera - Machine Learning with python
 - Great Learning - Network Security

Projects

- Customer Attrition Prediction ML System**
 - Developed a machine learning model using XGBoost to predict customer attrition with high accuracy.
 - Performed data preprocessing, feature engineering, feature selection, and hyperparameter optimization.
 - Built a Flask web application for real-time customer churn prediction and explainable AI visualizations.
 - Evaluated model performance using Accuracy, Precision, Recall, F1-Score, ROC-AUC, and Confusion Matrix.**Technologies:** Python, Flask, XGBoost, SHAP, Scikit-learn, Pandas, NumPy
- Explainable AI Stroke Risk Prediction System**
 - Built an end-to-end healthcare web application for stroke risk prediction using React.js and FastAPI.
 - Trained and optimized an XGBoost model for accurate stroke risk classification.
 - Integrated SHAP (SHapley Additive Explanations) to provide interpretable predictions and feature importance visualization.
 - Built secure patient management with CRUD operations using SQLAlchemy and SQLite.
 - Created interactive analytics dashboards for monitoring patient risk trends and model insights.**Technologies:** React.js, FastAPI, Python, XGBoost, SHAP, SQLite, Pandas, Scikit-learn
- HealthVision BI: Stroke Risk Analytics Dashboard**
 - Designed an interactive Power BI dashboard with KPI cards, slicers, and visualizations to analyze stroke risk factors.
 - Performed data cleaning, modeling, and reporting.**Technologies:** Power BI, Power Query,Data Modeling
- AI Powered Health Risk Prediction & Personalized Health Insights**
 - Developed a full-stack AI healthcare platform using React.js and FastAPI for real-time disease risk prediction.
 - Built machine learning models to assess disease risk and generate personalized health recommendations.
 - Integrated SHAP for explainable AI, providing transparent prediction explanations and feature importance.
 - Designed interactive analytics dashboards to visualize patient health trends and prediction insights.
 - Developed RESTful APIs and secure patient management using SQLAlchemy and SQLite.**Technologies:** React.js, FastAPI, Python, XGBoost, SHAP, Scikit-learn, SQLAlchemy, SQLite, Pandas, NumPy
